

First Base is a mineral-rich soil amendment designed for use in new construction mixes and maintenance applications. It loads your soil essential nutrients and growth promoting amendments to promote optimal plant growth and soil microbial activity.

First Base delivers establishment and recovery benefits from multiple soil conditioning components while minimizing the amount of organic matter added to your soil mixes.

- CONSTRUCTION MIXES**
- AERATION RECOVERY**
- SOD INSTALLATION**
- DIVOT MIX**
- LANDSCAPE PLANTINGS**
- SEEDING**

- Contains 100% natural, mineral-rich soil amending ingredients – NO manures, sewage sludge, or composts**
- Promotes robust soil biological activity, including chitin consuming bacteria**
- Provides readily-available calcium from naturally occurring, low Mg sources**
- Delivers multiple soil conditioning components in one easy application**

GUARANTEED ANALYSIS	
Total Nitrogen (N)	1.0%
1.0 % Water Insoluble Nitrogen	
Available Phosphate (P ₂ O ₅).....	2.0%
Soluble Potash (K ₂ O)	3.0%
Calcium (Ca)	11.0%
Derived from: Feather Meal, Crustacean Meal, Biochar, Kelp, and Mollusk Shells	
ALSO CONTAINS NON-PLANT FOOD INGREDIENT(S):	
Soil Amending Ingredients - Guaranteed Analysis	
Humic Acids	10.0%

Construction Mixes

Rate/1,000 Sq. Ft.	Rate/Acre
75 – 100 LBS	3,267 – 4,356 LBS

Construction Mixes - Apply First Base after the construction mix has been installed, and prior to final finish grading. Spread First Base at the recommended rates to the surface of the construction mix and till into the top 6 to 8 inches of the construction profile

Maintenance Applications

Rate/1,000 Sq. Ft.	Rate/Acre
15 – 25 LBS	654 – 1,089 LBS

Aeration Recovery - Apply First Base to the surface after the aeration plugs have removed. Spread First Base at the recommended rates and then drag into the aeration holes prior to topdressing. This will allow for deeper incorporation into the profile.

Seeding/Sod Installation – Apply First Base directly to the soil and incorporate into the to 1 -2 inches

Divot Mixes – Incorporate 4 – 5.5 lbs. of First Base per cubic yard of divot mix.

Landscape Plantings – Incorporate ½ - 1 cup of First Base per gallon of container size into the planting backfill.
